

GoGreen Consortium invites to the **WORKSHOP** PREVENTIVE CONSERVATION PLATFORM HERIe

Date: 4-5 December 2025

Place: Main campus Malet Street building on Torrington Square, Room B36
Birkbeck College, University of London

The digital decision-supporting platform **HERIe** (<https://herie.pl/>) offers remote access to data manipulation tools and quantitative assessments of risks to heritage assets.

HERIe was developed in collaboration with the Getty Conservation Institute, Canadian Conservation Institute, English Heritage, and University College London.

HERIe is the most frequently used digital tool, currently with 3100 users from 50 countries.

The **free** workshop will focus on damage functions developed within the GoGreen project and HERIe modules describing:

- mechanical damage due to environmental variations,
- chemical degradation,
- light damage,
- estimation of pollutant levels in rooms and showcases,
- design of showcases for RH control,
- risk of fire,
- automatic climate classification according to ASHRAE.

The hands-on workshop will illustrate how to use the platform to support conservators and museum professionals in the **sustainable preservation** of collections, as well as how to use it as a didactic tool for students.

Fill the **registration form** by November 20th and join us for a two-day workshop in London!
